

INDIAN INFRASTRUCTURES INVESTMENTS – 2007-2012

Introduction

The focus of the Indian Government is on developing roads, railways, bridges, mass housing, power and healthcare facilities. The Planning Commission had earlier estimated that investment requirement in the infrastructure sector will be to the tune of approximately € 350 billion during the 11th Five Year Plan period (2007-2012). The construction sector – whose contribution to Indian GDP has increased from 8% in FY06 to 8.5% in FY08 - is the key component of this process and is expected to create multiple downstream opportunities for several other sectors, such as steel, cement, and construction equipment.

Indian Infrastructure Investments – 11th Plan (2007-2012)	
Sector	Budget
<i>Civil Aviation</i>	35 Billion €
<i>Ports</i>	20 Billion €
<i>Power</i>	125 Billion €
<i>Railways</i>	50 Billion €
<i>Roads</i>	70 Billion €
<i>Urban Development</i>	25 Billion €
<i>Other</i>	25 Billion €
TOTAL	350 Billion €

Indian Infrastructure Investments – 2010-2012	
Sector	Budget
<i>Civil Aviation</i>	15 Billion €
<i>Ports</i>	13 Billion €
<i>Power</i>	60 Billion €
<i>Railways</i>	10 Billion €
<i>Roads</i>	30 Billion €
<i>Urban Development</i>	12 Billion €
<i>Other</i>	15 Billion €
TOTAL	155 Billion €

Eleventh Five Year Plan (2007-12)

Airports

The Indian aviation industry is one of the fastest growing aviation industries in the world. The government's open sky policy has led to many overseas players entering the market and the industry has been growing both in terms of players and number of aircrafts. Today, private airlines account for around 75% share of the domestic aviation market. According to the Ministry of Civil Aviation, around 29.8 million passengers traveled to/from India during 2008, an increase of 30% on previous year. It is predicted that international passengers will grow up to 50 million by 2015. Further, due to enhanced opportunities and international connectivity, 69 foreign airlines from 49 countries are flying into India.

The Indian Civil Aviation market grew at a rate of 18%, and was worth 4,1 billion € in 2008. Airlines recorded a double-digit growth in air traffic in August 2009, according to data released by the industry regulator Directorate General of Civil Aviation (DGCA). Domestic airlines flew 3.67 million passengers in August 2009, as against 2.92 million in the corresponding period last year—an increase of 26%. The Centre for Asia Pacific Aviation (CAPA) forecasted that domestic traffic will increase by 25% to 30% till 2010 and international traffic growth by 15%, taking the total market to more than 100 million passengers by 2010.

By 2020, Indian airports are expected to handle more than 100 million passengers including 60 million domestic passengers and around 3.4 million tonnes of cargo per annum.

Moreover, significant measures to propel growth in the civil aviation sector are on the anvil. The government plans to invest 6,6 billion € to modernize existing airports by 2010. The government is also planning to develop around 300 unused airstrips.

Development of Infrastructure

- Mumbai and Delhi airports have already been privatized and will be upgraded at an estimated investment of 2,9 billion € over 2006-16. Greenfield airports are operational at Bangalore and Hyderabad. These are built by private consortia at a total investment of over 587 Mln €
- A second greenfield airport being planned at Navi Mumbai is going to be developed using public-private partnership (PPP) mode at an estimated cost of 1.8 billion €.
- 35 other city airports are proposed to be upgraded. The city side development will be undertaken through PPP mode.
- Over the next five years, AAI has planned a massive investment of 2.25 billion € -43 % of which will be for the three metro airports in Kolkata, Chennai and Trivandrum, and the rest will go into upgrading other non-metro airports and modernizing the existing aeronautical facilities.
- An investment of 457 Mln € will be made by industries in the Aerospace and Precision Engineering Special Economic Zone at Adibatla, Ranga Reddy district.
- The country's first special economic zone (SEZ) dedicated to the aerospace industry has been inaugurated in Belgaum district, Karnataka. The SEZ—promoted by Quest Global, an aerospace engineering and manufacturing company—was undertaken at an investment of 23.8 Mln €.

Major Investments

Over the past year, various companies have shown an interest in the Indian aviation industry. Investment in airport infrastructure was over 3,7 billion € in 2008 and will go up 8,8 billion € by 2013, of which close to 4.9 billion € is expected to come through public private partnerships (PPP) model.

- Tata Advanced System Limited (TAS), a unit of the Tata Group, will set up a 83.4 Mln € helicopter manufacturing unit at the Aerospace Special Economic Zone (SEZ) in Adibatla village near the Hyderabad international airport. Further, the company has formed a joint venture with US-based Sikorsky Aircraft to make aerospace components in India.

- US aircraft maker, Boeing Co, will deliver 100 planes worth 12,5 billion € over the next four to five years to India.
- Changi Airports International is ready to enter into joint ventures with more Indian companies in developing airports. The company, which has picked up a 26% stake for 14,7 Mln € in Bengal Aerotropolis Pvt Ltd (BAPL) is looking at other opportunities.
- State-owned aerospace firm Hindustan Aeronautics Limited (HAL) has signed an agreement with Boeing to supply flaperons for the Boeing's 777 series commercial jetliners. It is understood that HAL will supply 600 units of flaperons to Boeing which will be delivered in phases by 2019.
- European passenger plane maker Airbus SAS will move 20% of its engineering and design activities to low-cost countries, a majority of it to India, by 2012.

Road Ahead

The Indian aviation sector is likely to see clear skies ahead in the years to come.

- Passenger traffic is projected to grow at a CAGR of over 15% in the next 5 years.
- The Vision 2020 statement announced by the Ministry of Civil Aviation, envisages creating infrastructure to handle 280 million passengers by 2020.
- Investment opportunities of 80,7 billion € envisaged up to 2020 with 58,7 billion € in new aircraft and 22 billion € in development of airport infrastructure.
- Associated areas such as maintenance, repair and overhaul (MRO) and training offer high investment potential. A report by Ernst & Young says the MRO category in the aviation sector can absorb up to US\$ 88 billion € worth of investments by 2020.
- Aerospace major Boeing forecasts that the Indian market will require 1,000 commercial jets in the next 20 years, which will represent over 3% of Boeing Commercial Airplanes' forecasted market worldwide. This makes India a US\$ 73,4 billion € market in 20 years.

Urban Transports

Mumbai Metro Project Phase-1

The project entails building 11-km metro corridor between Versova-Andheri-Ghatkopar stretch in Mumbai. Mumbai Metro One Pvt Ltd (MMOPL) is an SPV formed for this purpose. The stakeholders are Reliance Infrastructure, a Reliance ADA Group Company, Veolia Transport from France and Mumbai Metropolitan Region Development Authority (MMRDA).

MMOPL has achieved financial closure for the Versova-Andheri-Ghatkopar corridor project. The construction work has started on the project and so far 60% of the work is completed. The project is expected to complete till December 2010. Shyam Narayan & Brothers, SEW Constructions Ltd and Simplex Infrastructure Ltd are the civil contractors for this project. The project cost is 0,4 Mln €.

Chennai Metro Project

The Phase-1 involves construction of two Corridors with a combined length of 45 km. In the first phase, 24 km will be underground while 21 km will be elevated. Corridor I, with a length of 23.1 km (14.3 km underground and 8.8 km elevated), will run from Washermanpet to the Airport via Anna Salai.

Corridor II, with length of 22 km. (9.7 km. underground and 12.3 km. elevated), will run from Chennai Central to St. Thomas Mount via Koyambedu.

The portions of Corridor I from Washermanpet to Saidapet on Anna Salai, and Corridor II on Periyar EVR Salai and Anna Nagar 2nd Avenue, will be underground and the remainder elevated. The first tender was awarded in February 2009 for the construction of elevated viaduct from Koyambedu to Ashok Nagar for a length of 4.5 km to Soma Enterprise Ltd, Hyderabad at a cost of 30,6 Mln €.

The physical works have commenced. Design and construction bid of elevated viaduct on corridor-1 was invited in October 2009. The pre-qualification for design and construction of underground stations and associated tunnels was invited in November 2009.

Bangalore Metro Rail Project

Namma Metro is being implemented by the SPV – Bangalore Metro Rail Corporation Ltd. (BMRCL). Two double line corridors: East-West (EW) and North-South (NS) with a total length of 33 km is proposed and 35 stations being planned on the route.

The Karnataka Government cleared the project in March 2005 and Ahluwalia Contracts India Ltd is implementing a contract for construction of metro train depot cum workshop at Peenya as part of Phase-I. One and half month back, they have mobilized the equipments and recently started the work. The completion will take 27 months. The contracts have been awarded for construction of six elevated metro stations in Reach-I viz. S. V.Road and Ulsoor Stations at a cost of 11,6 Mln € to IVRCL Infrastructure Projects Ltd. and CMH Road and Baiyappanahalli Stations at a cost of 14,2 Mln € to IVRCL – CR 18G Consortium. A progress of 38% has been achieved at these stations. Trinity & MG Road Station works has been awarded to Punj Lloyd at a cost of 13,4 Mln €.

The works at all the six stations have already commenced and around 25% is done so far. The contract has been awarded to Simplex Infrastructure Ltd at a cost of 30,1 Mln € for construction of Elevated Structures (5.9 km) excluding stations and piling work as part of Reach-2. The work is progressing well. Total 341 piles is completed out of 1006, pile caps and segment casting in progress. Out of six stations, three stations viz., Tollgate 54/124 piles, Hosahalli – 60/124 piles & Vijayanagar-41/124 piles is awarded to Ahluwallia Contractors at a cost of 16,8 Mln € and work is progressing well. Another three stations Viz., Mysore Road terminal - 60/147 piles, Deepanjali Nagar –28/179 piles and Mysore road terminal is awarded to Punj Lloyd—Sembawag at a cost of 18,2 Mln € and work is progressing well.

Kolkata Metro Rail Project

Kolkata Metro Rail Corporation Ltd is implementing the East-West Metro corridor in Kolkata. The project was sanctioned on 30.7.2008 and is estimated to cost 0,7 Mln €. The project comprises underground and elevate route distance of 13.77 km from Howrah to Salt Lake Sector V , Land requirement of 22.60 ha of which 1.08 hectare is private land and 13 number of stations planned. So far, only 5 to 10% of the work is done and the completion is targeted by December 2013.

Roads & Highways

During the last three years, the government bid out 2,000 km of road construction contracts. In comparison to this, the central government will bid out 7,000 km of road construction contracts in the current fiscal.

Reliance Infrastructure Ltd led consortium has recently won National Highway Authority of India (NHAI) project worth 26,5 Mln € to construct a sixlane highway between Pune and Satara in Maharashtra.

The work will start in 3 months and the project is expected to be operational by July 2012. The project will be executed on a design, build, finance, operate and transfer (toll) basis with a concession period of 24 years, including the construction period.

GMR Infrastructure has bagged the road project worth 0,3 Mln € comprising 181-km National highway stretch between Hyderabad and Vijayawada in May 2009. The Hyderabad-Vijayawada road is a toll project with a concession period of 25 years. The company had signed the concession agreement in October 2009. Fund raising is in process and likely to complete by February 2010.

The Kerala State Transport Project (KSTP) launched in 2002 aims to improve 1,600 km of road network and 77 km of inland waterway in Kerala with a World Bank assistance of 187 Mln €. So far, 85% of the work on

various roads taken up for 'heavy maintenance' has been completed, 90% of the main road work is done, the Thiruvatta bridge, the Changanacherry boat terminal, the Arpookara bridge and four boat jetties have been completed. Work on 7 jetties is in progress. The feasibility study for the phase-II is likely to get over by March 2010.

IL&FS Transportation Networks Ltd has bagged the 4- landing project of the National Highway 24 between Moradabad and Bareilly worth 0,2 Mln €. NH 24 connects Uttar Pradesh's capital Lucknow to New Delhi via Shahjahanpur, Bareilly, Rampur, Moradabad and Ghaziabad. This project would be executed on a Design, Build, Finance, Operate and Transfer (DBFOT) basis for the National Highways Authority of India (NHAI).

Future Outlook

The Government of India has set a target of building 7,000 km of highways per year (20 km/day), which translates into a total investment of 59 Mln € in the next 3 – 5 years.

The 11th Five Year Plan estimates the urban housing shortage at the commencement of Plan period at 24.7 million units, with 99% of this shortage pertaining to the Economically Weaker Sections (EWS) and Lower Income Groups (LIG). As per Investment Commission of India, the real estate market is projected to grow to €60 billion by 2010 at a CAGR of 40%.

Airports Authority of India (AAI) has plans to incur expenditure of 1,9 Mln € for modernization of airports and air traffic services across the country during XIth Five Year Plan period (2007-2012). In the Port sector, the total anticipated investment is 8,6 Mln € for 276 projects covering the entire gamut of activities namely construction/upgradation of berths, deepening of channels, rail/road connectivity projects, equipment upgradation/modernization schemes and other related schemes. All this translates into huge opportunity for the sectoral players.

INFRASTRUCTURE PROJECTS/TENDERS IN INDIA

January 2010

Conceptual/Planning Stage						
N	Organization	Project Title / Details	Location	Budget Euro	Contacts	Sector
1	Government of Karnataka	The Government of Karnataka plans 1,000-acre aerospace zone planned near Devanahalli airport. So far, land has been acquired by the State agency Karnataka Industrial Areas Development Board in this regard. The zone comprises of MRO units and 250 acre of an export-oriented aerospace SEZ.	Devanahalli Karnataka	NA	Babu Nagesh, Executive Officer, Industries Facilitation Cell, Karnataka Udyog Mitra, 3rd Floor, No. 49, Khanija Bhavan, South Wing, Race Course Road, Bangalore - 560001. Tel: 80-22282392, Fax: 22266063, md@kumbangalore.com (KS Shivaswamy,MD)	Airport
2	Airport Authority of India (AAI)	AAI in association with the Mizoram government plans to construct the second airport at Kawmzawl, about 25km from the state's second biggest town of Lunglei. The length of this small airport will be 750 meter and its width is estimated at 150 meter.	Lunglei district Mizoram	NA	Rajiv Gandhi Bhawan, Safdarjung Air-port, New Delhi - 110003. Tel: 011- 24610517, Fax: 24652079	Airport
3	Airport Authority of India (AAI)	AAI plans to develop the Biju Patnaik Airport into an international airport. The construction work of the new domestic terminal is likely to start in April 2010. The new terminal will have a capacity to handle 800 passengers, which includes 400	Bhubaneswar Orissa	22.1 Mln €	Josy Francis, DGM, Biju Patnaik Airport, Bhubaneswar, Orissa-751020, Tel: 0674-2596307, Fax: 2596302, M: 09937094333	Airport

		incoming and 400 outgoing passengers.				
4	Hindalco Industries	The company plans to set up the Mahan Aluminium project comprising 360.000 tonne smelter capacity and 900 MW captive power plant. All the major approvals are in place and site activities are progressing well. Major contractors have mobilised at site and major chunk of land is already acquired. Orders have been placed for both the smelter and the power plant, around 58% of the total project cost has been committed. The first metal from the smelter would roll out by July 2011.
